DETAILED ACTION

Drawings

1. New corrected drawings are required in this application because the drawings are informal in nature (handwritten numbers and labels). Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Allowable Subject Matter

3. Claims 1-18 are allowed.

4. The following is an examiner's statement of reasons for allowance: None of the prior art alone or in combination discloses having the feature of an error amplifier coupled to the voltage storage devices and operable to output a signal based on a difference in voltage between the voltage storage device; the output signal coupled to another voltage storage device to obtain a voltage with respect to the output signal and

the voltage obtained from the output signal influences the difference in voltage between the voltage storage devices to decrease the difference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. This application is in condition for allowance except for the following formal matters:

The specification changes to the title and the drawings.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
